- Team work
- Time management abilities
- Problem-solving skills
- Analytical mindset
- Self-confidence
- Intrinsic motivation to continuous self development

ABOUT

I am a Business Informatics graduate with a focus on software development. I enjoy solving problems through programming. Creating something from scratch is always an outstanding achievement, but I would also enjoy joining an existing project. I aim to broaden my knowledge in software development by working on meaningful projects.

PROJECTS I WORKED ON

Forum web application (ASP.NET Core):

- MVC design pattern
- ASP.NET Core Identity for User management
- SignalR integration
- [Project link](#)

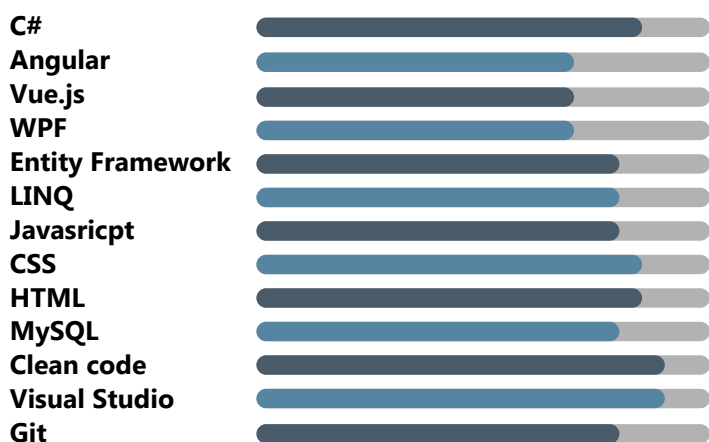

Unity 2D platformer game with C# scripts:

- Player/Enemy movement scripts
- Item collection scripts
- Player life scripts
- [Project link](#)

Single-page websites with Javascript and CSS:

- Responsive design
- Bootstrap
- Experience with Javascript frameworks, such as Angular

SKILLS
